

ACCUMATION

MACHINES FOR
BATTERY PRODUCTION AND SPECIALISED
MECHANICAL ENGINEERING

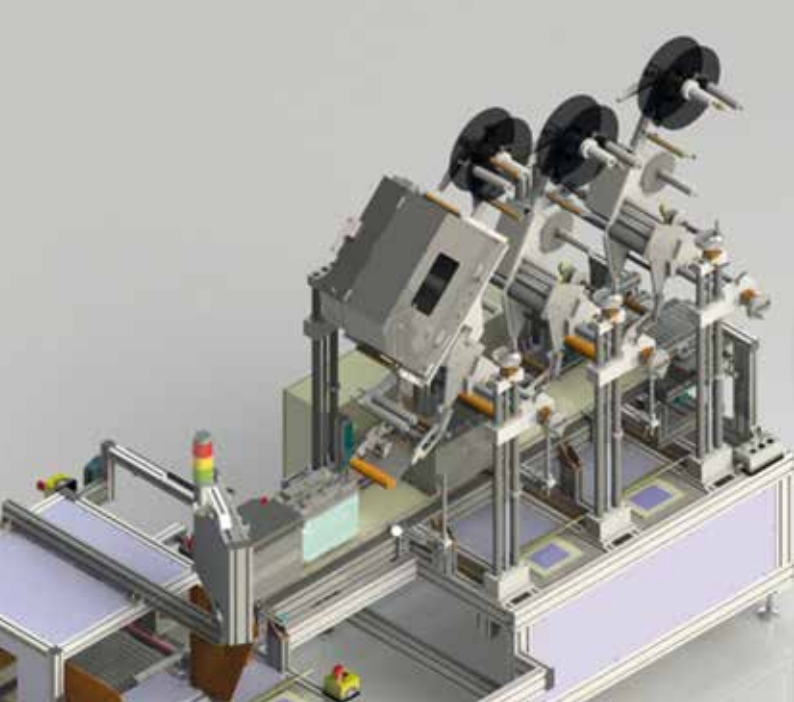

Our response to increasing market demands:

The battery-labelling machine for a wide range of labels, including those with variable, machine-readable codes

Nowadays, labels contain much more than just product information or manufacturer's data. Manufacturing companies must be able to print and apply a wide variety of labels, including those with variable, machine-readable codes, during the production run – keyword Industry 4.0. We have responded to this need and expanded our extensive machine portfolio.

The battery-labelling machine from Accumation helps you make this process more efficient.

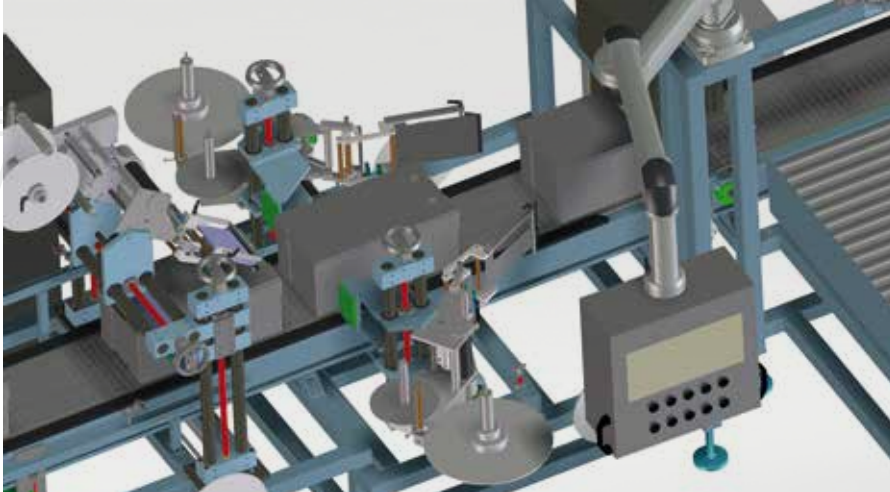

Your benefit:

- + Time-saving**
Labelling takes place during the production run, on up to 20 batteries/minute
- + Flexible**
Labelling on the front, back and top, printing with barcodes or other data
- + A wide range of formats**
Roll sizes up to 400 mm, booklets up to 3 mm, widths up to 150 mm
- + Precision**
Exact label positioning ($\pm 1,5$ mm)
- + Automatic barcode verification**
during the production run
- + Up to 6 top dispensers**
- + The latest technical standard**
for optimum quality, available with Siemens or Allen Bradley controllers

MACHINES FOR
BATTERY PRODUCTION AND SPECIALISED
MECHANICAL ENGINEERING

Front and back dispensers

EVERYTHING FROM A SINGLE SOURCE

**Machines (design + construction)
for the production of:**

- Starter batteries
- Traction batteries
- Industrial batteries

**We offer comprehensive services
and know-how:**

- Worldwide technical and customer services
- Many years of experience in battery plant construction
- Individual system solutions for your production
- In-depth advice and portfolio analysis on site

And we can do even more for you:

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects** we are able to offer you not only battery production machines but also **the appropriate testing technology** to test surfaces, for dimensional accuracy and completeness.
