

MACHINES FOR
BATTERY PRODUCTION AND SPECIALISED
MECHANICAL ENGINEERING

Guaranteed clean!

Washing and drying tunnel

During the production process the battery's exterior becomes contaminated with lead dust, sulphuric acid and other materials. This contamination must be fully removed prior to its delivery to customers.

EFFICIENT REMOVAL OF CONTAMINANTS

Accumation has developed a new, highly efficient washing and drying tunnel for this purpose.

Your benefit:

- + **Highly effective cleaning performance**
- + **Low water consumption** thanks to a cascade system
- + **Complete drying** of the batteries after cleaning
- + **Robust & corrosion resistant** entirely made of stainless steel 316 Ti
- + **Low energy consumption**
- + **Environmentally friendly** without the use of chemicals

MACHINES FOR
BATTERY PRODUCTION AND SPECIALISED
MECHANICAL ENGINEERING

The washing and drying tunnel is also available with brushes.

EVERYTHING FROM A SINGLE SOURCE

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects** we are able to offer you not only battery production machines but also the appropriate testing technology to test surfaces, for dimensional accuracy and completeness.
