Printing and application during the production run

Automated labelling for all common car and truck batteries

With our battery-labelling machine, you can print and apply a wide variety of labels with variable, machine-readable codes or other data – seamlessly and without interruption.

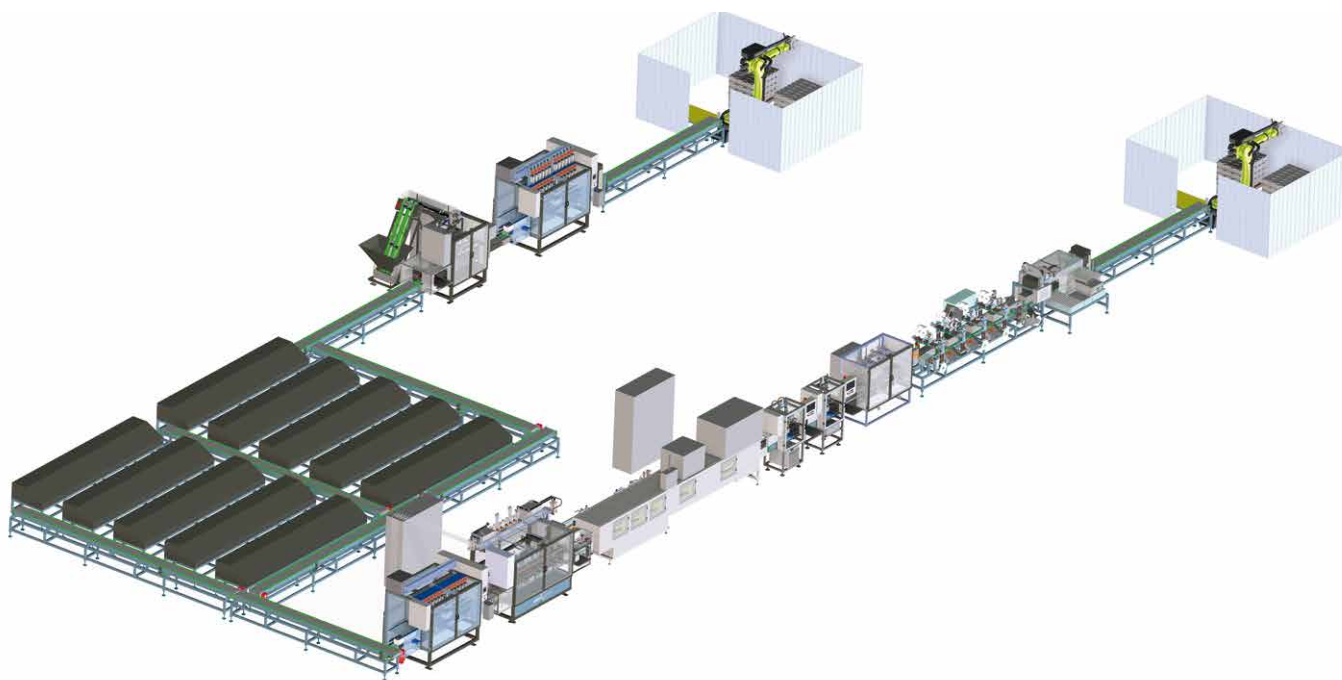

This minimizes downtimes and optimizes your entire production flow.

Your benefits:

- + **Time-saving**
Labelling takes place during the production run, on up to 20 batteries/min.
- + **A wide range of formats**
Roll sizes up to 400 mm, booklets up to 3 mm, widths up to 150 mm
- + **Automatic barcode verification**
during the production run
- + **Flexible**
Labelling on the front, back and top, printing with barcodes or other data
- + **Precise**
Exact label positioning ($\pm 1,5$ mm)
- + **Up to 6 top dispensers**
- + **Latest technical standard**
for optimum quality, available with Siemens or Allen Bradley controllers

Complete finishing line from a single source

- Acid filling machine
- Formation bottles mounting
- Formation tubs
- Acid levelling machine
- Plug setting machine
- Battery washing and drying system
- High rate discharge test machine (PLT)
- High voltage leak test machine (HVT)

- Open circuit voltage test machine (OCV)
- Brushing and lubrication system for battery poles
- Battery labelling machine
- Palletizing robots

Further systems for your battery finishing line on request.

Pütz Group – a strong association of specialists.

Our network of experts optimises your production for maximum efficiency.
